Individual Treatment for All Skins

aellas

Treatment with Aellas Peeling Platform

Aellas Peeling is an innovative therapy strategy for improving and rejuvenating the skin's appearance.

The peeling exfoliates the top layers of the skin, resulting in new skin that is smoother and fresher, as fine lines and imperfections disappear.

It stimulates cell renewal and natural production of hyaluronic acid, and it increases regeneration of elastin and collagen fibers in the upper layer of the skin. The skin is then rehydrated, replenished and refreshed.

Treatment with Aellas Glyco-50

Before

After 4 sessions

Treatment with Aellas Jessne

Before

After

After a close evaluation of your skin type and condition, your practitioner can determine what would be the best treatment plan for you in order to achieve the desired result. With the Aellas innovative technology the peeling penetrates quickly and evenly, and works on your skin in a gentle and tolerable manner.

Aellas Peeling treatment can be tailored to your needs and combined with other aesthetic treatments – ask your physician for more information!

Treatment Options for Every Skin Type

A unique gel formulated specifically for the delicate eye area; safe and gentle. Aellas Glyco-Eye will firm the skin, reduce fine lines and give it a fresh appearance.

A gentle revitalizing and refreshing peeling for improvement of skin structure. Aellas Jessner can be used for treating skin impurities, pigmentation, moles and fine lines.

Aellas Glyco-50 has a stronger effect on dead skin cells and aging skin. It effectively minimizes skin impurities and reduces wrinkles. It can be used on face, décolleté, forearms and hands.

Salicylic acid is one of the most effective substances for treating oily skin, comedones and acne prone skin. Aellas Salic-25 provides a gentle yet effective clarifying and rejuvenating of the skin.

This medium-depth treatment is highly effective in revitalizing aging skin. Aellas TCA-25 has excellent results on age- and pigmentation spots, sun damaged and sagging skin.
